SKILLS

- **C**
- **C++**
- **Java**
- **Html, CSS, Javascript**
- **Three js**
- **React js**
- **GSAP**
- **Tailwind css**
- **Git**

EDUCATION

- ❖ College Branch | College   *CGPA*: *7.7 | (2024)*
- ❖ XII (ICSE) | Loyola School
  70.6%| 2023

ACADEMIC PROJECTS

- ❖ **Employee management system**
  A web-based platform for managing employees, their tasks, and administrative roles, built using React.js and Tailwind CSS

- ❖ **duoWebsite Clone**
  A replication of a popular website's UI/UX and functionality, showcasing proficiency in front-end development and design

- ❖ **Resturant website**
  A feature-rich website for restaurants, including menus, reservations, and contact forms to enhance user engagement and branding.

- ❖ **Resturant website**
  A cloud-based file storage and sharing system designed to manage, upload, and access files securely and efficiently

- ❖ **Uber Clone**
  A ride-hailing platform replicating Uber's core features, including real-time ride booking, driver tracking, and fare estimation, built to demonstrate app development skills.

POSITION OF RESPONSIBILITY

- ❖ **Technical Head | Coding Club, AIT**   *(20-05-2024)*
  Organized hackathons and conducted interactive sessions on Web Development for over 10 college students, fostering learning and innovation.

ACHIEVEMENTS / HOBBIES

- **Technical Projects**

  Successfully developed and deployed an **Employee Management System** using React.js and Tailwind

CSS, managing employee tasks and administrative roles.

Built an **Uber Clone** with real-time ride booking and driver tracking functionality to demonstrate app development expertise.

➢ **Hackathon Participation**

Winner/Top Finalist at [Hackathon Name], leading a team to develop an innovative [project name] solution using [technology stack].

➢ **Community Contributions**

Conducted Web Development workshops for 300+ college students as the **Technical Head** of the Coding Club, mentoring peers on modern tech stacks like React.js and Tailwind CSS.

➢ **Certifications**

Earned certifications in **React.js Development**, **Full Stack Web Development**, and **JavaScript** from reputable platforms like Coursera and Udemy.

➢ **Open Source Contributions**

Contributed to open-source projects by resolving issues, enhancing documentation, and adding features to repositories on GitHub.

➢ **Academic Achievements**

Achieved **Top 9% ranking** in college second year for Principle of Programming.

➢ **GitHub Portfolio**

Maintains an active GitHub profile showcasing a variety of projects, including:

• **Employee Management System**: A web-based platform for managing employees, their tasks, and administrative roles, built using React.js and Tailwind CSS.

• **Uber Clone**: A ride-hailing platform replicating Uber's core features, including real-time ride booking, driver tracking, and fare estimation, built to demonstrate app development skills.
